(note in 1.4 that the order of the highest derivative appearing in the equation is two.) **introduction to differential equations** - used textbook "elementary differential equations and boundary value problems" by boyce & diprima (john wiley & sons, inc., seventh edition, c 2001). many of the examples presented in these notes may be found in this book. the material of chapter 7 is adapted from the textbook "nonlinear dynamics and chaos" by steven
